# HOW TO Enhance Text Using HTML

---

## Introduction

After you have added or modified the default text, you may still want to add additional text, table, and links. These can be added into the messages, headers and footers, and other text boxes that also accept HTML.

## About this Guide

Store images, representing certain looks or features, are shown with labels and red arrows pointing to specific items in the store. The labels are links to an Administrative Interface image.

- Click the **red callout** in the store to go to the corresponding Administrative Interface page.
- To return to the store image page, click Adobe Reader's Go Back (Go to Previous View).

You will see one or more pages containing store images, followed by the corresponding Administrative Interface image. In this way, you should be able to locate the same entry point for the data you want to add to your store.

This guide shows you examples of adding HTML text. If you need more information for a specific function, go to <http://www.miva.com/docs/merchant/> and select the appropriate version link for the Miva Merchant User Guides.

## Paragraphs

When this store was first created, in the Look & Feel Configuration Wizard we added an image and text to the Welcome Message. After adding products and categories to a store, you can also use the Look & Feel Configuration Wizard to add products or categories to your store front in table columns. But, here we are focusing on the text. For information on adding graphics, see the customizing guide “Change and Add Images” and the Miva Merchant User Guide “*Change the Look & Feel of Your Store, Using the Look & Feel Configuration Wizard.*”

This initial Welcome Message includes only an image and text. This text has only a limited amount of HTML – only a few line breaks <BR> and the mail tag. But, nothing in the text really stands out. Let's add some HTML to change the font weight and size, add some bullets, and perhaps change the color.

## Font Properties

### Font Weight and Style

The first paragraph now stands out with the bold text, (the <B> tag). Compare it to the previous page.

Italics and underline text should be minimized. Italics is a bit difficult to read online. Underline text has traditionally been used to identify a link. Instead use colors, bold, and/or increase the font size. You could also use the format to call attention to items, such as a bulleted list.

## Font size

Here, for the titles we used the in-line tag <H2> for the first heading (Welcome to our Shop). The last line (Thanks for visiting) uses the font size +1.

The font size tag uses a relative size range between -3 to +3. This is mapped to an absolute font size by adding the current base font size as set by the BASEFONT element, or set by the user's Browser. Heading 1 <H1> is equivalent to +3, Heading 2, <H2> equivalent to +2, and so on.

Welcome Message

## Font Face

Non-serif fonts (those without the little tails) seem easier to read online. Therefore, we've changed the font face of the Welcome message, using the in-line HTML tag `<Font Face="Arial, Helvetica, sans-serif">`. We used three font names to be sure to include fonts of all platforms.

Welcome Message

## Bullet List

The bulleted list provide directions for the shoppers. Notice the Email is also included here.

The HTML is the standard unnumbered list.

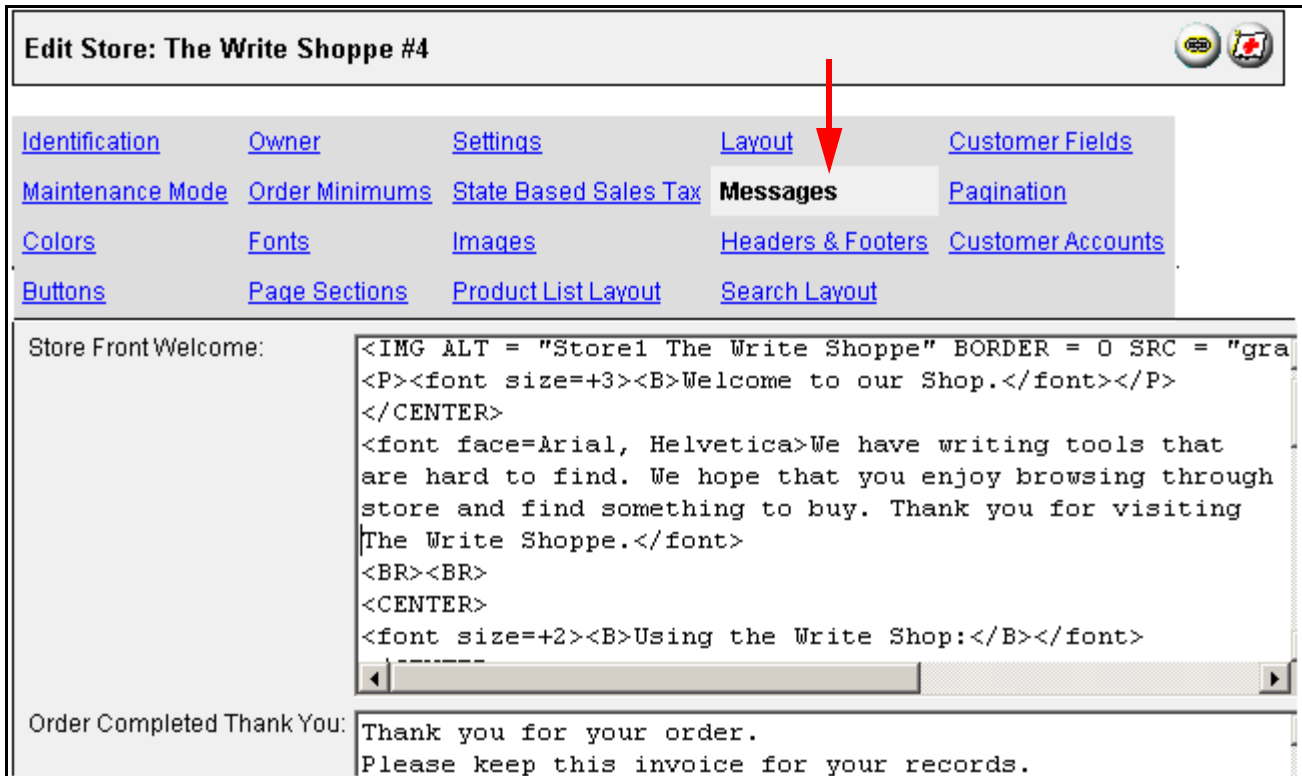

Welcome Message

## Changing Font Properties

Miva Merchant allows you to enter the HTML code in text boxes to format your data.

**Edit Store: The Write Shoppe #4**

<P><font size=+3><B>Welcome to our Shop.</font></P>
</CENTER>
<font face=Arial, Helvetica>We have writing tools that
are hard to find. We hope that you enjoy browsing through
store and find something to buy. Thank you for visiting
The Write Shoppe.</font>
<BR><BR>
<CENTER>
<font size=+2><B>Using the Write Shop:</B></font>
```

Order Completed Thank You:

Thank you for your order.  
Please keep this invoice for your records.

We've formatted this text using alignment, font attributes and properties, and paragraph elements.

The image was added earlier by the Look & Feel Configuration Wizard. Adding graphics with HTML is discussed in a separate guide.

To modify text:

1. In the Administrative Interface, click your store name, then click the Messages link.
2. Enter the text (paste or type) into the Store Front Welcome text box.
3. Identify the phrases you want in larger text size. (You can use the `<font size=+2>` or the `<H2>`, for example.
4. Identify those you want centered `<center>`.
5. Click Update.

**Complete HTML Text**

```

color = "#6E3900">
<B>Thanks for visiting!</B></font>

<!-- #5A3921 nav bar bkgrnd -->
<blockquote>
```

## Tables

The store image below contains two tables in the Welcome Message. The first contains only three cells: text in the first, an image (new Write Shoppe logo) in the second, and text in the third cell. No background color is used in this table. Using tables helps align your data.

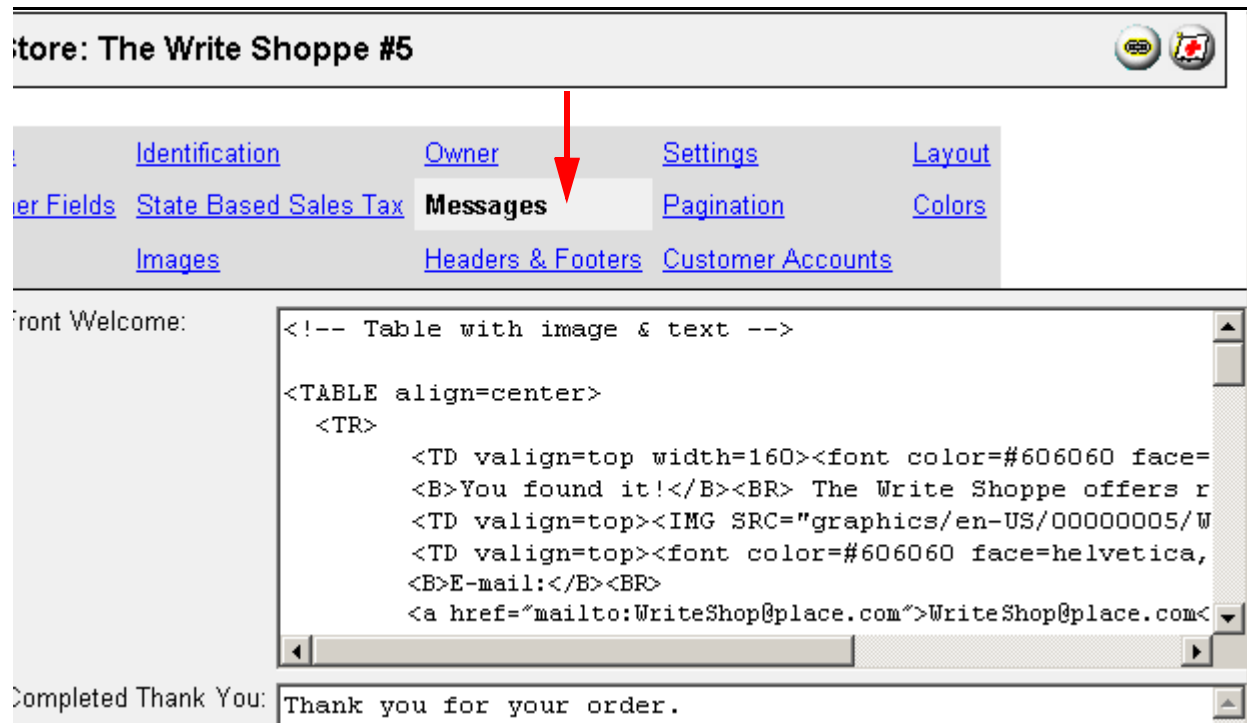

The second table in our store uses an image for the background. Here, we've used a leather look, which provides some texture to the page. We used different colors for two of the table cells. Using the HTML table tag `<TD bgcolor="#FFFFC0">`. Why? It helps to highlight each of the ideas.

Also notice the use of font colors `<font color="#C0FFC0">`, for example. We've also defined the size, and face.

## Entering A Table in Welcome Message

It's often a good idea to create an HTML file you can view in a browser or two, before copying the HTML (minus the body/head tags) into the Store Front Welcome Message text box.

Store: The Write Shoppe #5

[Identification](#)
[Owner](#)
[Settings](#)
[Layout](#)

[er Fields](#)
[State Based Sales Tax](#)
**Messages**
[Pagination](#)
[Colors](#)

[Images](#)
[Headers & Footers](#)
[Customer Accounts](#)

Front Welcome:

```
<!-- Table with image & text -->

<TABLE align=center>
  <TR>
    <TD valign=top width=160><font color=#606060 face=
    <B>You found it!</B><BR> The Write Shoppe offers r
    <TD valign=top><IMG SRC="graphics/en-US/00000005/W
    <TD valign=top><font color=#606060 face=helvetica,

    <a href="mailto:WriteShop@place.com">WriteShop@place.com<
```

Completed Thank You: Thank you for your order.

To insert a table

1. Create a separate HTML text file. Edit it until it looks the way you want.
2. In the Administrative Interface, click your store name, then click the Messages link.
3. Copy all but the HTML, HEAD, and BODY tags from your separate HTML file and paste it into the Store Front Welcome message text box.
4. Click Update.

      <LI><i><b>His Birthday?</b></i>
      <LI><i><b>Work Anniversary?</b></i></font>
    </TD>
  </TR>
</TABLE>

```

## A Table in the Category Footer

This top-level category does not contain products, only other categories, therefore its page is empty by default. In this case, we used the category's footer to include information about the origin of our products. It's in the footer so that the Category Title, Desk Top Items, displays above the table. (Category headers display above the Category Title.)

The screenshot shows a web page for 'Desk Top Items'. On the left is a green sidebar with a navigation menu. The main content area has a title 'Desk Top Items' and a paragraph of text. Below the text is a table with two columns: 'Writing Objects' and 'From'. A red arrow points from the text 'Category Footer' to the 'Letter Openers' link in the sidebar menu. Another red arrow points from the same text to the 'Writing Objects' header in the table.

**Category Footer**

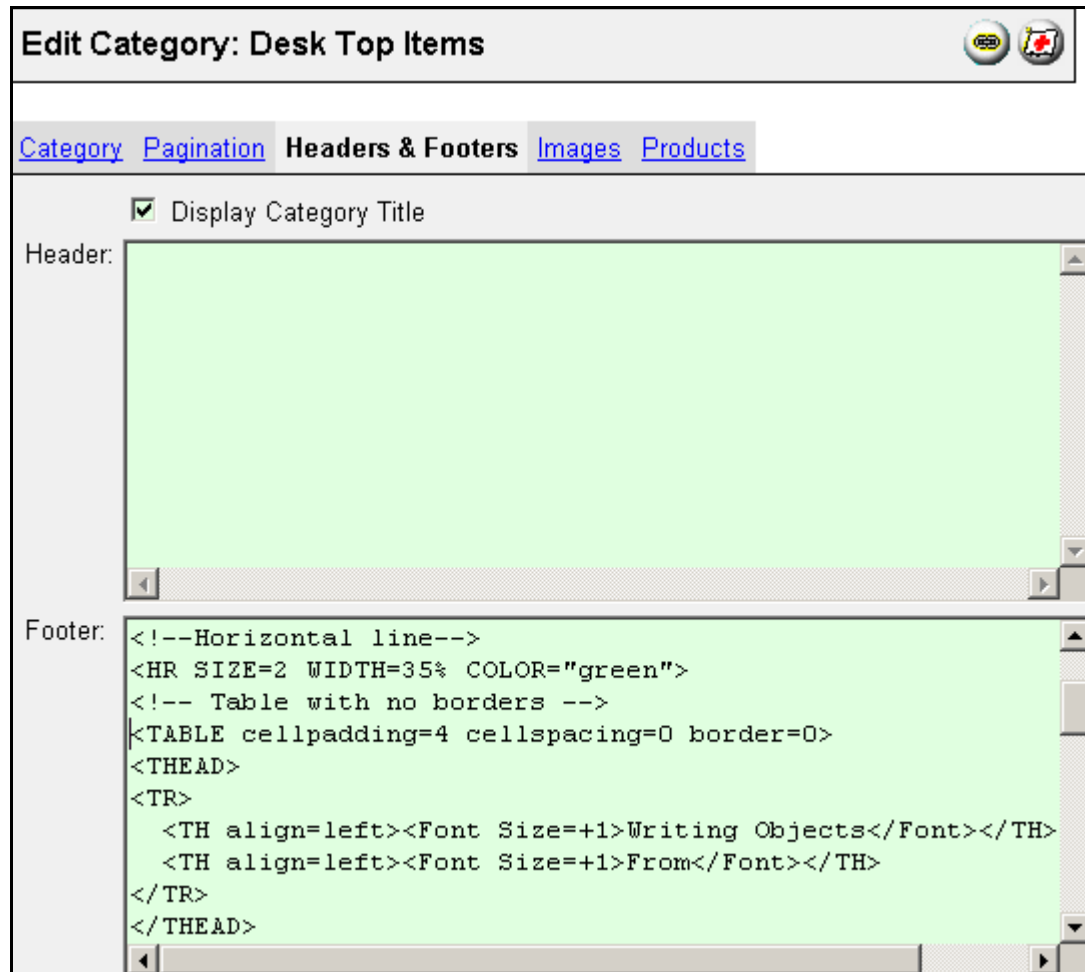

**Desk Top Items**

We spare no effort in obtaining the best quality searching not only in the United States, but across the globe to bring you objects to add just the right touch to your desk.

Writing Objects	From
Victorian Inkwells, Silver Letter Openers	England
High-quality Pen Sets, Cut Glass Inkwells	Germany
Porcelain Inkwells, Artwork	France
Leather Briefcases, Letter Openers	Australia
Wood Pens	Brazil

## Entering a Table in Category Footer

Similar to entering data into the Store Front Welcome message, you may want to try out the data in a separate HTML file, first. Paste it (without the <body> and <HTML> tags, into the Category Footer.

**Edit Category: Desk Top Items**

[Category](#) [Pagination](#) **Headers & Footers** [Images](#) [Products](#)

☒ Display Category Title

Header:

Footer:

```
<!--Horizontal line-->
<HR SIZE=2 WIDTH=35% COLOR="green">
<!-- Table with no borders -->
<TABLE cellpadding=4 cellspacing=0 border=0>
<THEAD>
<TR>
  <TH align=left><Font Size=+1>Writing Objects</Font></TH>
  <TH align=left><Font Size=+1>From</Font></TH>
</TR>
</THEAD>
```

To insert the table:

1. In the Administration Interface menu, under the name of your store, click the name of the desired category. (Click the down arrows to expand the category, if needed.)
2. Click the Headers & Footers link.
3. Paste the HTML text (without the <body> and <HTML> tags, or type your table directly into the Category Footer.
4. Click Update.

## Table Above a Store Front Image

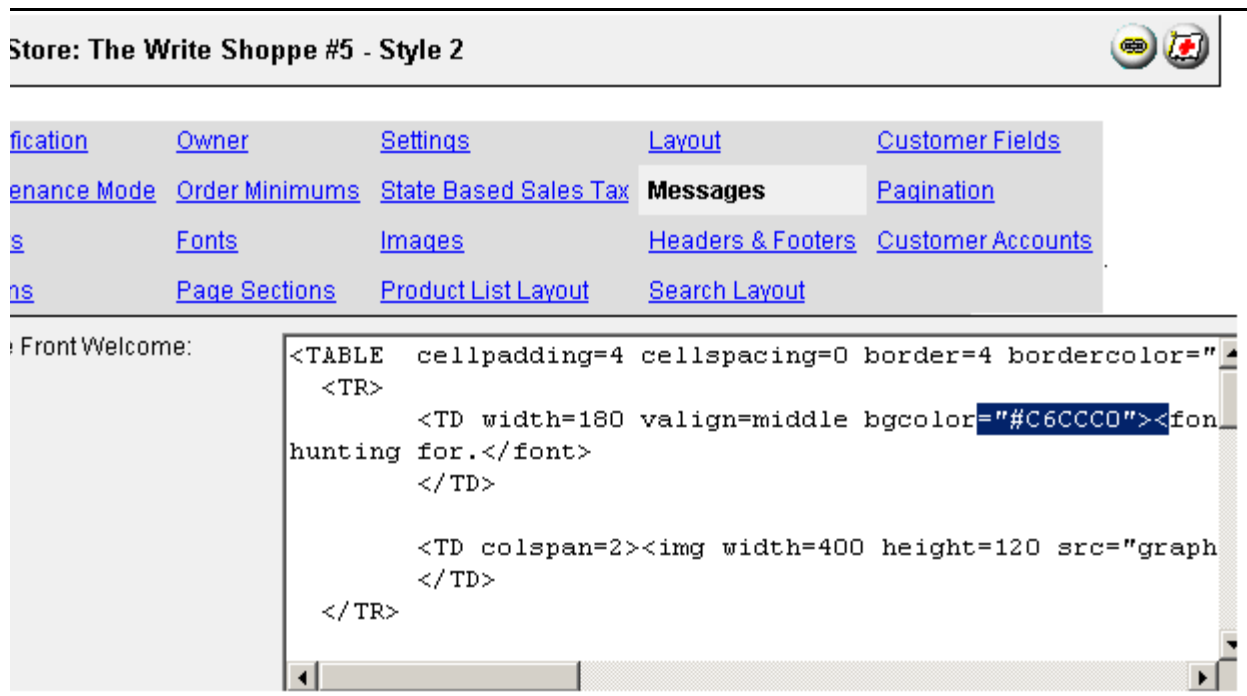

The following store image contains one table entered in the Store Front Welcome message. Notice that you can see the background image (the marble) behind the Write Shoppe image. This is because the Write Shoppe graphic is a gif format with a transparent background, and no background color was defined for the cell containing the image. The other cells of the table include a background color (TD bgcolor="#C6CCC0">, otherwise the text would not be readable on the marble background, which brings into question whether or not it is a good design decision to use such a background. (See the Web Design links in the *Internet Resources* guide.) Notice the choice of images for the categories. The wrought iron scroll works well with marble.

## Entering A Table Above Store Background Image

Create an HTML file you can view in a browser or two, before copying the HTML (minus the body and html tags) into the Store Front Welcome Message text box.

It's a good idea to see how it looks in a couple browsers, and if possible, in different operating systems. (Different browsers, and environments can affect how the pages look.)

After you paste the data into the text box, it may not look exactly as it did when it stands on its own. This is due to the other elements that are part of your store.

To insert a table

1. Create a separate HTML text file.
2. In the Administrative Interface, click your store name.
3. Click the Messages link (as shown in the image here).
4. When the HTML file appears as you want, copy all but the HTML, HEAD, and BODY tags and paste it into the Store Front Welcome message text box.
5. Click the Update button at the bottom of the data page.

### Complete HTML Text for One Table above Store Background Image HTML

```
<TABLE cellpadding=4 cellspacing=0 border=4 bordercolor="#366CA3"
frame="hsides" rules="rows">
  <TR>
    <TD width=180 valign=middle bgcolor="#C6CCC0"><font color="#366CA3"
size=-1><B>You found it!</B></font><BR><font size=-1> The Write
Shoppe offers those rare writing tools you've been hunting for.</
font>
    </TD>
    <TD colspan=2>
    </TD>
  </TR>
  <!-- A row used as a separator -->
  <TR>
    <TD colspan=3><P>&nbsp;</P>
    </TD>
  </TR>
  <TR>
    <TD valign=top bgcolor="#C6CCC0">
      <font color="#366CA3" size=-1><b>Featured Products<BR>This Month:</
b></font><BR>
      <LI><font size=-1><i><b>Victorian Brass Inkwells</b></i></font>
      <LI><font size=-1><i><b>Woodpens from Brazil</b></i></font>
      <LI><font size=-1><i><b>Bakelite Letter Openers</b></i></font>
      <LI><font size=-1><i><b>Egyptian Bookends</b></i></font>
      <LI><font size=-1><i><b>Bankers Lamp</b></i></font>
    </TD>
    <TD width=180 align=center valign=top bgcolor="#C6CCC0">
      <font color="#366CA3" size=-1><B>Please Note:</B></font><BR>

      Enjoy browsing through our unique writing store!</font>
    </TD>
    <TD valign=top bgcolor="#C6CCC0"><font color="#366CA3" size=-
1><b>Have you forgotten:</b></font>
      <LI><font size=-1><i><b>Her Promotion?</b></i></font>
      <LI><font size=-1><i><b>His Birthday?</b></i></font>
      <LI><font size=-1><i><b>Your Anniversary?</b></i></font>
    </TD>
  </TR>
</TABLE>
```

## One-celled Table In Category Footer

This table uses the same gray color as the table on the store front page and the Category Tree background, so as to not add more variety, with an already somewhat busy background image. Identifying the table background color makes the text readable, which it would not be above this marble background.

## Entering One-Celled Table

We entered the table in the Category footer so the Category Title, which is checked on, (see the side image) displays above the table.

**Edit Category: Desk Top Items**

[Category](#) [Pagination](#) **[Headers & Footers](#)** [Images](#) [Products](#)

☒ Display Category Title

Header:

Footer:

```
<P>&nbsp;</P>
<Table cellpadding=8>
  <TR>
    <TD bgcolor=#C6CCCO>
      <Font size=+1><B>A variety of items to decorate your
writing desk or use them to help you with your writing
projects.</B></Font><BR><BR>
      <blockquote>
        Inkwells have been used to store ink for nib pens for
hundreds of years. These are beautiful enough to decorate
```

To insert the table:

1. In the administrative interface menu, under the name of your store, click the name of the desired category. (Click the down arrows to expand the category, if needed.)
2. Paste the HTML text (without the <body> and <HTML> tags, or type your table directly into the Category Footer.
3. Click the Update button at the bottom of the page.

**Complete HTML Text for a One-celled Table**

```
<P>&nbsp;</P>
<Table cellpadding=8>
  <TR>
    <TD bgcolor=#C6CCC0>
      <Font size=+1><B>A variety of items to decorate your writing desk
      or use them to help you with your writing projects.</B>
    </Font>
    <BR><BR>
    <blockquote>
      Inkwells have been used to store ink for nib pens for hundreds of
      years. These are beautiful enough to decorate your desk.
    <BR><BR>
      Letter Openers can help you open your mail more readily.
    <BR><BR>
      Of course, you need pens and pencils with which to write as in days
      gone by!
    <BR><BR>
    </blockquote>

    All of these special items will inspire you to write better and
    often!

  </TD>
</TR>
</Table>
```

## Bulleted Lists

HTML also provides a way for you to create bulleted lists, which, in this case, are included in our second table, as shown in the following store image.

(The link below will take you back several pages, showing a table entered into the Administration Interface messages.

## Links to Products from Store Front

This store front looks very much like the previous one. However, we have added links. Notice the “Contact Us” is now a mailto link, and the “Featured Products of the Month” and “Have you Forgotten” items are linked to specific products.

The “Have You Forgotten” links could also go to hidden categories. (Products can be assigned to more than one category.) See the customizing guide “Change Store Layout” about hidden categories.

## Adding A New Product Link

Again, you may want to create your table in a separate HTML file. However, you may not be able to test the store links (links to your store's products) until you paste it into the text box, or put it in your Merchant2 script directory.

Edit Store: The Write Shoppe #6

<a href="#">Identification</a>	<a href="#">Owner</a>	<a href="#">Settings</a>	<a href="#">Layout</a>	<a href="#">Customer Fields</a>

    <B><a href="mailto:name@place.com">C

```

Order Completed Thank You:

```

Thank you for your order.
Please keep this invoice for your records.

```

To create the links

1. In the Administrative Interface menu, click your store name, then click the Messages link.
2. Enter the mailto: tag for your store, in the format `<a href="mailto:name@place.com">Contact</a>`.
3. Get the address for the product you want to link to:  
In your Administration Interface, go to the product page to which you want to create a link. In the top, right corner, click the link button, then copy the Product Display URL.

**Note:** Usually a link in your store to an item in your store can be a relative link. (Starting with "merchant.mv?" as shown in the Complete HTML text on following page.) (Relative links will not work for cgi style stores, and if the link is outside the store.)

4. Enter the product address you copied as the destination for the HTML `<a href>` tag.
5. Click Update.
6. Test your link.

**Complete HTML Text for a Product List**

```
